WORKFLOW

KOTELOV

01

Holding a meeting

Building the communication process for fast and efficient work.

02

Signing an NDA

If necessary, we sign an NDA with the client.

After that, we study the description of the project and the stack.

03

Sending the candidate's CV and cost

Experienced recruiters select a specialist according to your requirements.

If the candidate suits you, we schedule a technical interview. The whole process takes us from 2 to 4 weeks.

04

Signing a contract and bringing a specialist to the project

05

Payment

At the end of the month, we reconcile worklogs and issue an invoice.

REVIEWS AND AWARDS

KOTELOV

Microsoft®

Dmitry Butyanov, Microsoft RUS PBE

«The guys from Kotelov developed a large-scale system that required extremely high technical expertise and helped us take the service on board to a new level.»

S7 Airlines

Anastasia Kovtun, S7 Airlines Project Manager

«A great team of professionals who quickly adapt to the regularly changing customer requirements and complete tasks efficiently and on time.»

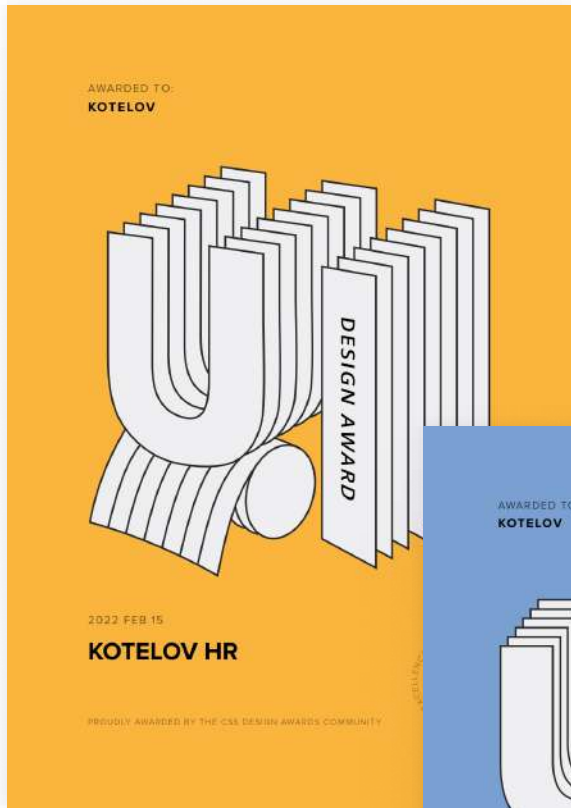

SkillStaff

Polina Belyatskaya, CEO SkillStaff

«The Kotelov company employs a lot of highly qualified specialists, they promptly respond to requests, take initiative and have high professional competence..»

PROJECTS

iPad app for flight attendants of S7 Airlines.

The best service for work automation
Tagline Awards 2021

We helped flight attendants to get rid of 10 kg of paper on the flight. Abandoning all paper media – filling out reports on the iPad. Briefing on the tablet – briefing about the upcoming flight: collecting passenger data, defects of the jet, dangerous cargo.

Improving the level of service on board – a personal menu and consideration of the passengers' needs. Data acquisition system – chat with ground services, mail, receipt of new documents.

Projects

Secure corporate messenger for Microsoft

Microsoft faced a need to improve the in-house communication system Skype for Business by creating a mobile app with extra functions. The challenge was to create a messenger and to integrate it into the existing system, while adding new features to it.
